

LIZ IVY WAHOME

DATA ANALYST | BUSINESS INTELLIGENCE | SOFTWARE ENGINEERING

Nairobi, Kenya • +254 740 096 425 • ivylizwahome@gmail.com • GitHub • LinkedIn

PROFESSIONAL SUMMARY

Mathematics and Computer Science graduate with professional software engineering experience and a growing specialization in Data Analytics and Business Intelligence. Experienced in developing production software, working with structured data, building Power BI dashboards, and translating business requirements into technology solutions. Skilled in SQL, Excel, Python, Power BI, data cleaning, visualization, and databases, with a strong interest in product analytics, fintech, and data-driven decision making.

TECHNICAL SKILLS

Data & BI	SQL • Power BI • Excel • Data Cleaning • Data Visualization • Data Modelling • Statistics • Business Intelligence
Programming	Python • Pandas • NumPy • Matplotlib • Flutter • Dart • REST APIs
Databases & Systems	MySQL • SQLite • Firebase • Git & GitHub • Linux • Docker (Basic)

PROFESSIONAL EXPERIENCE

Mobile Engineer — Liana Technologies

February 2024 – November 2025

- Contributed to OneKitty, a production fintech application supporting over 5,000 active users.
- Worked with REST APIs and structured JSON data to support secure financial transactions.
- Collaborated with backend engineers, product managers and designers to deliver scalable mobile solutions.
- Participated in troubleshooting, release validation and performance optimization.
- Applied analytical thinking to solve technical and business problems.

Mobile Engineer — Solutech Limited

April 2024 – June 2024

- Developed and enhanced mobile application functionality using Flutter and Dart.
- Diagnosed and resolved production issues to improve application stability.
- Collaborated with development and QA teams during implementation and testing.
- Supported deployment and feature validation activities.

Software Engineering Attaché — Techbiz Limited

- Participated in software development, testing, deployment and documentation.
- Assisted with software quality assurance and issue tracking.
- Gained practical experience across the Software Development Life Cycle.

SELECTED DATA ANALYTICS PROJECTS

Global Layoffs SQL Analysis — Completed

- Cleaned and analyzed a global layoffs dataset covering March 2020 to March 2023 using MySQL.
- Used staging tables, CTEs, ROW_NUMBER(), data standardization, date conversion and missing-value handling.
- Analyzed layoffs by company, industry, country and year; identified 383,159 layoffs recorded in the cleaned dataset.
- Identified 2022 as the peak year with 160,661 layoffs; 2023 data is partial through March.

Kenya Property & Rental Analytics — In Development

- Synthetic analytics project using property, unit, tenant and payment data.
- Dataset includes 20 properties, 1,915 units, 1,695 tenants and approximately 74,798 payment records.
- Exploring payment behaviour, occupancy patterns and revenue trends using SQL, Excel and Power BI.

EDUCATION

Bachelor of Science (BSc) in Mathematics and Computer Science

Technical University of Mombasa • Graduated 2024

LEADERSHIP & COMMUNITY

- **Founder — Flutter Developer Community:** Founded and led a university-based developer community with 200+ members; organized technical workshops, mentorship and collaborative learning.
- **Founder — SheDevs Community:** Established a women-focused technology community supporting 180+ aspiring women in technology.

CERTIFICATIONS & TRAINING

- Data Analytics with Power BI — Coursera (In Progress)
- Preparing Data Analysis with Microsoft Excel — Coursera
- Harnessing the Power of Data with Power BI — Coursera
- Extract, Transform and Load Data in Power BI — Coursera
- Dart Programming — Udemy
- Flutter Development — Udemy
- Mobile App Development — Udemy
- Near Certified Web3 Developer — FreeCodeCamp
